This is in response to Applicant's amendment filed on May 19, 2006 in which claims 1-81 were canceled, and claims 82-117 were added.

Status of Claims

Claims 82-117 now renumbered 1-36 are pending.

Allowable Subject Matter

Claims 82-117 now renumbered 1-36 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: the present invention is directed to methods and apparatus for monitoring and maintaining the consistency of documents having related overlapping content, for example documents in which the content is represented using XML (extensible Markup Language) and other related technologies. The closest prior art [Hino U.S. Patent no. 6,185,563] discloses a document management method and apparatus for ensuring consistency of document contents. However, Hino is silent on a methodology for **generating consistency link data including a locator associated with a location within the structured electronic document based upon the determination**. This claimed feature being present in all the independent claims render claims 82-117 now renumbered 1-36 are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
